Front End Web Developer

SUMMARY

My goal as a front-end web developer is to create pixel-perfect user experiences. JavaScript, CSS, React.js, and responsive web design abilities were recently obtained. I also have a full-stack development certificate from the University of Texas in Austin. Mobile-first designer and developer with an emphasis on creative problem-solving. Every project I work on aims to further engage my audience and provide a memorable user experience. I was a member of a five-person team that developed a social network for gardeners that also allowed users to track the progress of their plants. I'm excited to put my abilities to work as part of a highly motivated, results-oriented team to improve user experiences.
